**Collaborative:** Students will be expected to do work in groups. Please interact in a positive way with one another and work together to keep our classroom safe, clean and productive.

**Professional:** Students will work on the Do NOW for the first 10 minutes of class. Each student is expected to bring a binder and other supplies.

**Respectful:** Students will listen to their peers, teacher to be successful in class. Respect yourself and everyone in the room. No Bullying will be tolerated!!! Use appropriate voice levels.

Students demonstrate they have developed the ability to solve real world and mathematical problems using ratios and unit rates

# 4 Students will demonstrate in depth inferences and applications that go beyond the learning goal

# 3 Students demonstrate they have developed the ability to solve real world and mathematical problems using ratios and unit rates

# 2 Students demonstrate they have developed the ability to use ratio language to describe a ratio relationship between two quantities

# 1 Students performance reflects insufficient progress towards foundational skills and knowledge
